Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The RCE request and amendment received 3/24/06 have been entered and unamended claims 123-128 are currently pending in this application. Please update the status of the related application in the specification. And please inform the examiner as to how the present CIP application differs from the parent application.

The amendment filed 3/24/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The two amendments to pages 22 and 27 of the specification.

In the copy available to the examiner of the original specification of 09/822,131 the specification is 41 pages long. In the specification and claims of 6,670,113 no kit is found related to the present claims. Where the presently submitted amendments to the specification are found is not seen. In the claims originally presented in the present application, claims 50-52 are directed to a kit but are not enabling for the present claims.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1655

Claims 123-128 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification as originally presented provides no enablement or written description for the presently pending claims.

Applicant's arguments filed 3/24/06 have been fully considered but they are not persuasive.

Applicant argues that the parent issued patent provides enablement for a kit and the parent patent has been incorporated by reference.

It is the examiner's position that Applicant has not pointed out precisely where in the printed patent or specification as originally presented enablement is found for the present claims. The present specification does not provide written description for the claims as presented which is required, see MPEP 608.01(p). Note no new material may be added.

Art Unit: 1655
